3.殘斷字形(Handling of the original broken)

After verification by experts, it was found that there are some characters contains broken glyphs in the original book due to rubbing or other conditions; the finding was mainly based on the same component glyphs of the same version. Therefore, correction was processed according to the meaning of the character and the reference of other versions. Since showing broken glyphs as the representative glyphs would be confusing for the implementers, the modified representative glyphs would be used in the proposal.

經由專家查核並討論,並且經由《說文》釋義與相同部件比對之後,認為是殘斷的字形,就會依字理恢復原形。
